*Providing Quality
Products and Services to
Health Practitioners*

Purchase Restrictions

Kan Herb Company produces quality products to be sold to Healthcare practitioners only. We believe that maintaining good health takes more than just buying a product from the shelves of a local merchant or from a website retailer that makes products available to the general public. Kan Herb Company does not promote or accept this kind of selling.

We believe that supporting the health of each and every individual is better served when a learned intermediary is involved. This is why we ourselves only sell to Healthcare practitioners and we expect these practitioners, in turn, to only resell our products to individuals with whom that have entered into a relationship for the purpose of supporting that individual's health, which also includes physically seeing each individual in a one on one session. Kan Herb Company does not sell its products to practitioners that, in turn resells products in an unrestricted manner to anyone that wants to order them over a website or at a Health Food store.

Kan Herb Company products may only be purchased by qualified healthcare practitioners, qualified healthcare students, qualified healthcare facilities (e.g., pharmacies, medical clinics and hospitals) and consumers having a distribution issued by a qualified healthcare practitioner. *Other restrictions may apply.* Questions about qualifications should be directed to Kan Herb Company at customer@kanherb.com or by calling 1-800-543-5233.

You may resell products purchased on this site only if you are a qualified healthcare practitioner, qualified healthcare student, or qualified healthcare facility described in the immediately preceding paragraph (a "Qualified Reseller"). If you are a Qualified Reseller, you may resell products purchased on this site only to consumers whom you have physically seen, and with whom you have entered into a business relationship for the purpose of assisting them on health related matters. The purpose of these business relationships must extend beyond selling our products to these consumers.
